Who We Are

IN22Labs (Unwind Learning Labs Pvt Ltd) is a technology company specializing in e-Governance solutions that digitize government operations, improve transparency, and enhance citizen services. With offices in Chennai, Vijayawada (India) and the USA, we deliver end-to-end digital transformation for governments.

Digital Transformation & E-Governance Platforms

We design and implement e-Governance platforms that streamline public administration, automate workflows, and improve service delivery for citizens and government agencies alike.

Cloud, Mobile & Data Analytics

From scalable cloud solutions and mobile app development to advanced data analytics and interactive dashboards — we empower smarter, data-driven governance decisions.

Why Digital Governance?

Governments worldwide are adopting digital technologies to enhance efficiency, transparency, and accessibility. Digital governance transforms public service delivery, enabling data-driven decision-making and creating citizen-centric services that are faster, smarter, and more accountable.

Service Delivery

Improve service delivery and enhance operational efficiency through streamlined digital workflows and automated government processes.

Transparency

Increase transparency and enable data-driven decision-making with real-time dashboards and open digital records accessible to all stakeholders.

Citizen-Centric

Create citizen-centric services that are accessible, responsive, and inclusive — putting the needs of the public at the heart of governance.

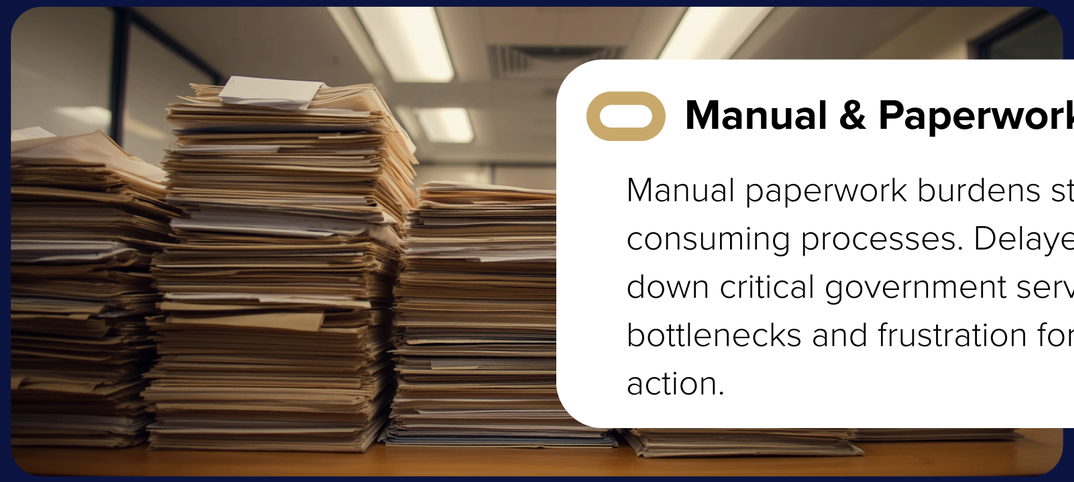
Innovation Delivered!

Common Challenges

Traditional governance systems face critical operational barriers that slow service delivery, increase costs, and reduce transparency for citizens and administrators alike.

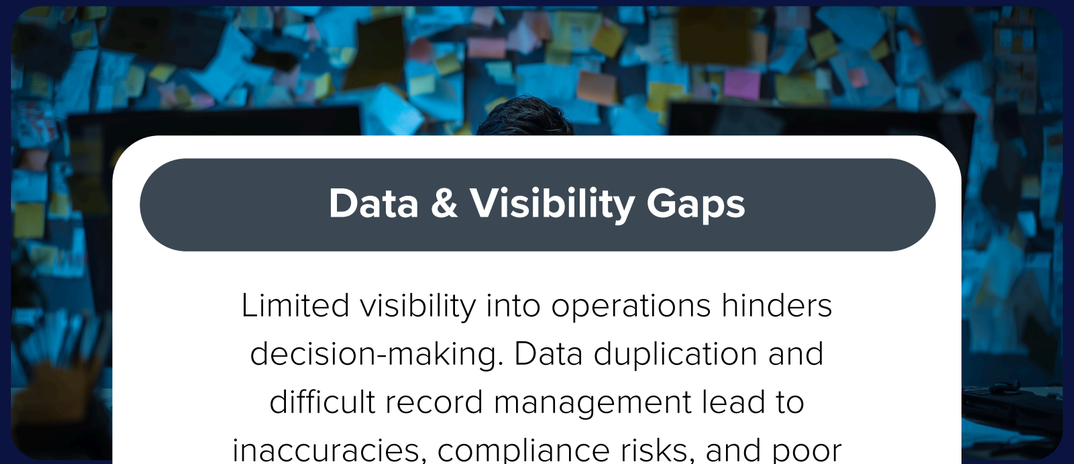


Manual & Paperwork Issues

Manual paperwork burdens staff with time-consuming processes. Delayed approvals slow down critical government services, creating bottlenecks and frustration for citizens awaiting action.

Operational Inefficiencies

Fragmented systems prevent seamless information sharing across departments. High administrative costs and slow service delivery drain government budgets and reduce overall operational efficiency.



Data & Visibility Gaps

Limited visibility into operations hinders decision-making. Data duplication and difficult record management lead to inaccuracies, compliance risks, and poor resource allocation.

Comprehensive Digital Solutions

IN22Labs offers an end-to-end e-Governance portfolio designed to digitize and streamline government operations across multiple sectors and departments.

- LMS Suite Software
- Social Welfare Suite
- E-Office & File Management System
- Vendor & Bill Management System
- GIS & Tagging Solutions

Analytics & Finance

Dashboard & Analytics Solutions, Finance & Audit System, and Fisheries & Inland Water Management System — enabling data-driven decisions and financial transparency across government operations.

Cloud & Environment

Pollution Control & Environment System, Managed Cloud Solutions, and Mobile App Development Services — delivering scalable, secure, and citizen-centric digital infrastructure.

Learning & Social Welfare Solutions

IN22Labs delivers integrated digital platforms that modernize education delivery and streamline social welfare administration for governments and public sector institutions.

LMS Suite

Online learning platform for government training programs. Includes course management, assessments & certifications, and training analytics to track learner progress and outcomes effectively.

Social Welfare Suite

Beneficiary registration, scheme management, and eligibility verification. Enables benefit tracking and MIS reporting to ensure transparent, efficient delivery of welfare services to citizens.

E-Office & File Management System

IN22Labs' E-Office platform transforms traditional paper-based administration into a fully digital, streamlined workflow. Eliminate manual processes, accelerate approvals, and enable secure, paperless collaboration across government departments with ease.

Digital Workflows

Seamless digital file movement and electronic approvals with automated routing. Workflow automation ensures tasks reach the right officer instantly, eliminating delays and manual handoffs.

Document Control

Centralized document management with a secure repository. Supports version control, access permissions, and full audit trails — ensuring compliance and easy retrieval of records anytime.

Key Benefits

Faster approvals, significantly reduced paperwork, and better cross-department collaboration. Enables paperless administration with real-time status tracking and transparent governance operations.

Financial & Vendor Management Systems

Streamlined financial operations and vendor management solutions that bring transparency, efficiency, and accountability to government procurement and financial processes.

Vendor & Bill Management System

- Vendor Registration & Onboarding
- Purchase Order Management
- Invoice Processing & Verification
- Payment Tracking & Reconciliation
- Approval Workflows & Audit Trails

Finance & Audit System

- Budget Management & Allocation
- Financial Reporting & Dashboards
- Audit Compliance & Controls
- Expense Monitoring & Alerts
- Transparency in Financial Operations

GIS & Tagging Solutions

Leverage geospatial intelligence to monitor, manage, and map government assets with precision. Our GIS & Tagging Solutions enable location-based monitoring, infrastructure tracking, and field data collection for smarter governance.

Mapping & Monitoring Capabilities

GIS mapping of government assets and infrastructure. Geo-tagging for real-time location tracking. Field data collection with mobile integration. Location-based monitoring and alerts.

Key Applications

Rural development and land management. Urban planning and smart city projects. Asset management and project monitoring. Infrastructure tracking across regions.

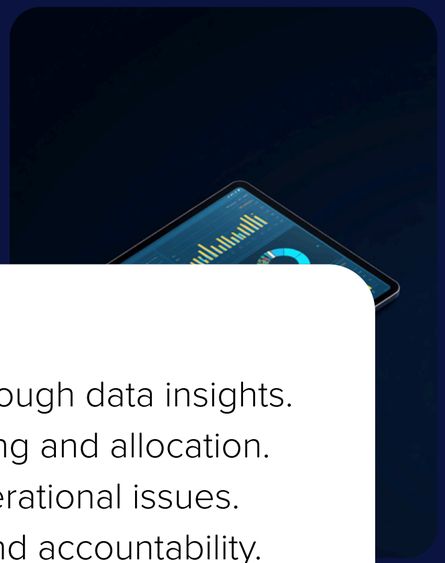
Dashboard & Analytics Solutions

Harness the power of data with interactive dashboards and real-time analytics. Our platform delivers actionable insights to drive smarter policy decisions, optimize resource planning, and accelerate issue identification across government operations.



Key Features

Interactive dashboards with real-time KPIs. Performance monitoring across departments. Advanced data visualization tools. Custom reports tailored to governance needs.

Strategic Benefits

Better policy decisions through data insights. Improved resource planning and allocation. Faster identification of operational issues. Enhanced transparency and accountability.

In22 labs
Innovation Delivered!

Specialized Government Solutions

Targeted digital platforms for niche government sectors — enabling smarter resource management, regulatory compliance, and real-time operational oversight across fisheries and environmental domains.

Fisheries & Inland Water Management

Water resource monitoring across inland water bodies. Fisheries management with license tracking and registration. Production analytics for yield and harvest reporting. Field data collection and geo-tagged asset tracking for sustainable resource governance.

Pollution Control & Environment System

Environmental monitoring with real-time sensor integration. Inspection management and scheduled compliance audits. Incident reporting and escalation workflows. Regulatory reporting dashboards for pollution control boards and environmental agencies.

Cloud & Mobile Technologies

Empowering governments with secure, scalable cloud infrastructure and citizen-focused mobile applications — enabling seamless service delivery anytime, anywhere.

Managed Cloud Solutions

- Secure cloud hosting for government data
- Scalable infrastructure on demand
- Backup & disaster recovery systems
- High availability & uptime guarantee
- 24/7 proactive monitoring & support

Mobile App Development

- Android & iOS citizen service apps
- Field officer mobile applications
- Offline data collection capability
- Push notifications & alerts
- User-friendly, accessible interfaces

Operational Benefits

IN22Labs' e-Governance solutions deliver measurable improvements across government operations — from faster service delivery and reduced paperwork to enhanced security, real-time monitoring, cost optimization, and scalable digital infrastructure.

Efficiency & Delivery

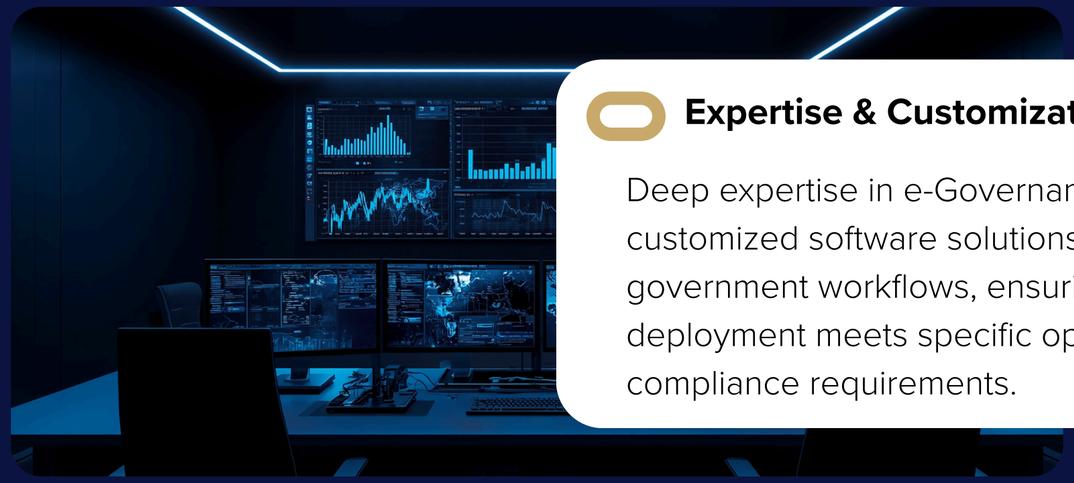
Faster service delivery to citizens, reduced administrative paperwork, streamlined workflows, and significant cost optimization across government departments.

Transparency & Accuracy

Improved transparency in operations, better data accuracy, real-time monitoring of services, and data-driven decision-making for policy and resource planning.

Security & Scalability

Enhanced security for government data, scalable digital infrastructure, continuous system availability, and end-to-end implementation support for all solutions.

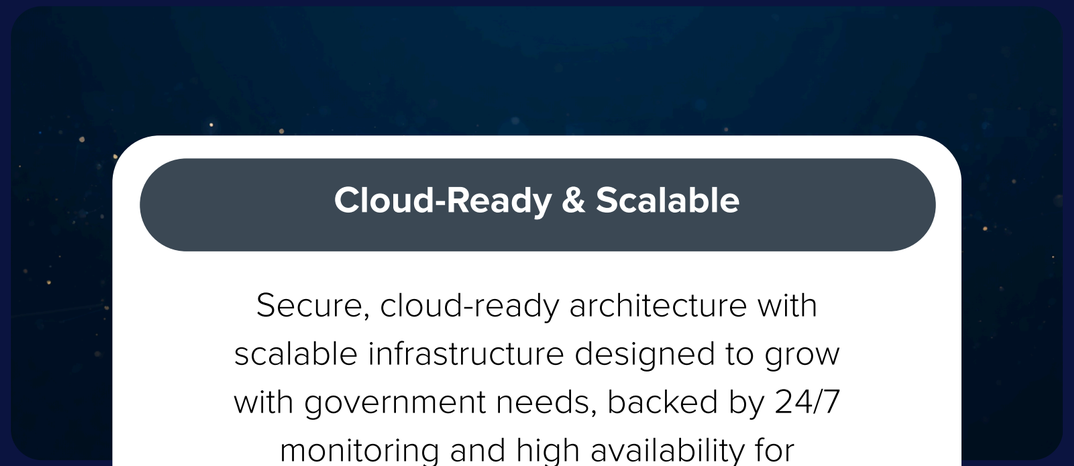


Expertise & Customization

Deep expertise in e-Governance with fully customized software solutions tailored to government workflows, ensuring every deployment meets specific operational and compliance requirements.

End-to-End Support & Innovation

Comprehensive end-to-end implementation support from onboarding to deployment, paired with continuous innovation and dedicated customer support to ensure long-term platform success.



Cloud-Ready & Scalable

Secure, cloud-ready architecture with scalable infrastructure designed to grow with government needs, backed by 24/7 monitoring and high availability for uninterrupted service delivery.

Our Strengths

IN22Labs delivers secure, scalable, and user-friendly e-Governance platforms with end-to-end implementation support, continuous innovation, and dedicated customer service — empowering governments to transform digitally with confidence.
